

Red Shadow

The pattern mirror collection offers countless different patterns on single glass or laminated glass. Applying mirrors to both sides of the glass creates depth, dynamics and shadow within the glass panels. As we are in control of all stages of the production process, we can adapt each of our techniques to fully suit the needs of your project. This applies, for example, to silvering (mirrors), painting or the use of different types of glass, ultimately, the decision is up to you. A mirror with a pattern is an excellent solution for the interior, as a wall panels or room partition because it reflects light, provides intimacy and creates a feeling of luxury in the space.
