Estetika i tehnologija

Metal Mesh Laminate Collection stakla su pogodna za oblikovanje raznih dijelova namještaja, pregradnih stijena za interijere i staklenih fasada. Struktura tkanja, istaknuta metalnim slojem i dodatno oživljena u interakciji sa svjetlom, postiže snažan estetski dojam. Kod pregradnih stijena i vrata, ovisno od vrste metalne mrežice i njene gustoće, može se postići veća ili manja transparentnost stakla koja utiče na stvaranje privatnosti i intimnosti u prostoru.
